DETAILED ACTION

1. Claims 1-5 are presented for examination.
2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The current title is imprecise.

Specification

3. The abstract of the disclosure is objected to because in line 10, "the uses" should be --the user--. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 U.S.C. § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the rotation speed" in lines 25-26. There is insufficient antecedent basis for the limitation in the claim.

Claim 3 recites the limitation "the user" in line 3. There is insufficient antecedent basis for the limitation in the claim.

Claims 2-5 are rejected because they incorporate the deficiencies of claim 1.

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 2115

7. Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The limitation "wherein one ends of the two resistors and heat dissipating fan are connected to the switching and display units, respectively" is not properly described in the specification as filed. But only -- wherein one ends of the two resistors are connected to the switching and display units respectively -- described in the specification.

Claims 2-5 are rejected because they incorporate the deficiencies of claim 1.
